HIGH PERFORMANCE STROLLERS

## **Bug Canopy**

**Instructions**

# Bug Canopy Installation

*This canopy works only on 2004/05 Single models*

## STEP 1

Sun Canopy must be in the extended position. Unfold Bug Canopy and position it over the top of the sun canopy. The black nylon fabric should be toward the bottom by the footplate.

## STEP 2

Tuck Bug Canopy's back flap underneath Jogger handle.

## STEP 3

Secure the Bug Canopy's back flap to the side. Repeat the same step on other side.

## STEP 4

Pull the black nylon fabric down over the footplate of the stroller. Wrap the velcro straps under and around the footplate and secure to each other.

## STEP 5

Secure Bug canopy sides around Jogger' upright using velcro tabs.

## STEP 6

Adjust the rear webbing strap to accommodate the position of the seat. If it's in the recline position simply release the strap to loosen.
